

Leeson Polyurethanes are pleased to announce a vacancy for a Laboratory QC Technician.

We are a major UK manufacturer of urethane adhesives, coatings and binders. We have a history and Business Plan with significant above average growth and require a strengthening of our Technical Team. The successful applicant will initially be responsible for Quality Control.

What we offer

- Full training in Polyurethane Chemistry.
- Responsibility for Quality Control.
- Responsibility for production of customer samples.
- Responsibility for a number of concurrent short term projects where the candidate will be expected to plan the work involved, to develop the products and carry out testing and be aware of the final application for the product.
- Development of products which are very strongly customer related with a fast project turnover.
- Opportunity to work in a dynamic environment and to be personally responsible for developing new products for our markets.

The position offers a generous base salary and above all the opportunity to work with a highly successful team.

Required: Immediately

HOW TO APPLY: In the first instance, please forward a copy of your current CV in confidence to Laura.plater@lpultd.com and all successful candidates will be in 14 days of your application.

Required Skills and Expertise.

Skills required

- 2:1 Science based degree preferably in Chemistry/Material Science (Polymers)
- Self-motivated with a strong drive to achieve tangible results within short time frames.
- After training, the ability to work on your own with regular project updates.
- Good communication skills and a high level of organization.
- Good prioritising skills
- Full clean driving licence
