

**TECHNICAL MANAGER**  
**POLYURETHANE COATINGS/ADHESIVES/BINDERS**

We are a major UK manufacturer of polyurethane coatings, adhesives, binders and foam systems based in Warwick. We have significant above average growth and require a strengthening of our Technical Development Team. The successful applicant will be responsible for Product Development, Customer Technical Service and Quality Control of our polyurethane business reporting to the Managing Director.

You will require:

- Good commitment, leadership and organizational abilities
- Self-motivated with a strong drive to achieve tangible results within short time frames.
- Good communication skills and the competence and confidence to undertake trials and technical support at customers' premises.
- At least 7 years' experience in a polyurethane based development laboratory.
- 2:1 degree or equivalent in Material Science (Polymers)/Chemistry.
- After training, the ability to work on your own with regular project updates with the Managing Director.

What we offer:

- Full training in our area of Polyurethane Chemistry.
- Responsibility for a dynamic development lab working on polyurethane based product development. The candidate will be expected to supervise the work involved, to develop the products and carry out testing and be aware of the final application for the product.
- Responsibility for taking new products from Laboratory made samples to pilot plant manufacture and finally full scale product manufacture.
- Development of products which are very strongly customer related with a fast project turnover.

( A bond for life )

Required: Immediately

The position offers a generous base salary and above all the opportunity to work with a highly successful team.
