

Fawsley Hall Hotel

There has been a manor on this site as early as the 7th Century, but the current building was begun in the 16th Century and successive Lords of the Manor have made improvements. Many monarchs have been entertained there, including Elizabeth I in 1575. The hall was left vacant in the 20th Century and fell into decline until it was bought and converted to a luxury country house hotel.

In a recent upgrade, the pathways and driveways were laid with LeesonGrip with Danish Quartz aggregate for its high quality and elegant finish. This contrasts charmingly with the greenery and warm honey colour brick of the building.

Project Key Facts

**Product: LeesonGrip
D3149 & Danish Quartz**

Area: 2000m²

Date: April 2016
