

### Project Key Facts

Product: LeesonGrip D3149

Aggregate: Danish Quartz

Area: 600m<sup>2</sup>

Date: October 2008

### Amsterdam Schiphol Airport

For the safety of the passengers who may be rushing to catch a plane, LeesonGrip Anti-Skid system was installed at Terminal 2 of Amsterdam's Schiphol Airport. With installation time being of the essence and the need to reopen the section for travellers, the product was chosen because it is easy to spread and can be applied and smoothed rapidly. The fast-curing speed meant that the site was reopened to pedestrians in 4 hours causing minimal disruption to passengers.
